The screenshot shows the ArcSDE Concepts page under the Versioning section. The page title is "Versioning". A text block explains that versioning supports multiuser editing without creating multiple feature classes. Below the text is a diagram illustrating versioning:

Diagram illustrating versioning:

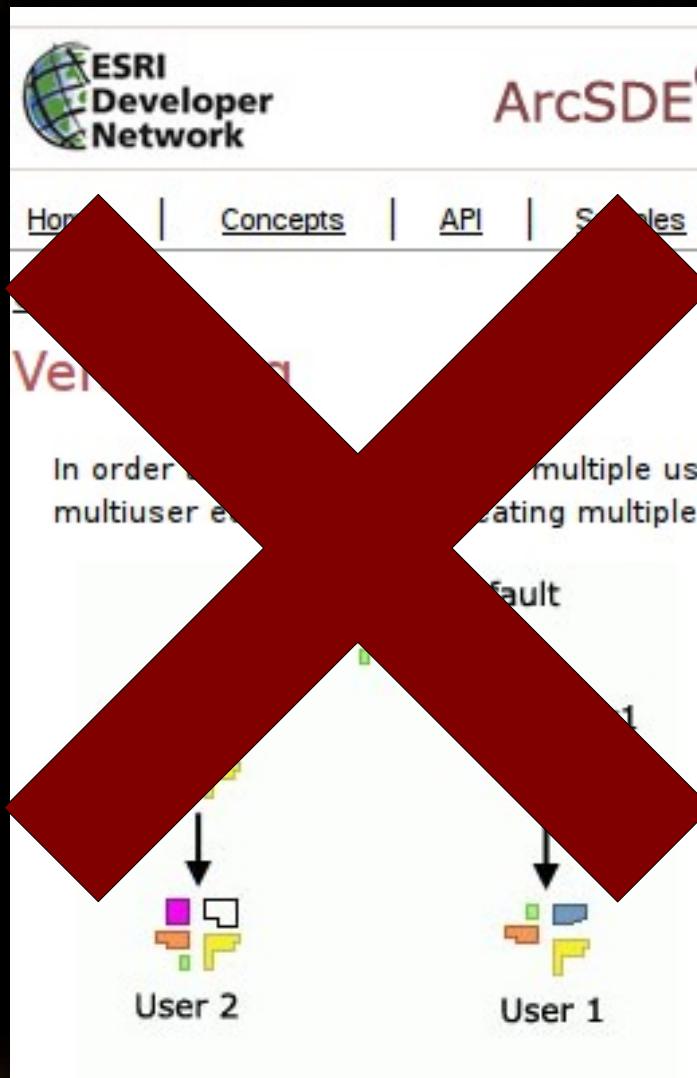

- A central node labeled "Default" has two arrows pointing down to "v2" and "v1".
- "v2" has an arrow pointing down to "User 2".
- "v1" has an arrow pointing down to "User 1".

The nodes are represented by a stylized icon composed of colored squares (blue, green, yellow, orange) and a small "F" shape.

The screenshot shows the GeoServer interface with the "Versioning WFS" section highlighted. The main heading is "GeoServer". Below it is a navigation bar with links: Dashboard, GeoServer, ..., GeoCollaborator, and Versioning WFS. The "Versioning WFS" link is underlined, indicating it is active. The main content area displays the text "Versioning WFS".
