

MDS Series

High-Performance Models

φ 172mm-51mm

Materials

Frame : Die Cast Aluminum
Blades : Resin
Flammability Grade: V-O

Specifications

Model	Rated Voltage DC V	Rated Current A	Rated Speed r/min	Max. Air Flow m ³ /min (m ³ /h)	Max. Static Pressure Pa	Noise Level dB (A)
MDS1751-24	24	0.70	3200	6.0(360)	137	47

- Values for maximum air flow and maximum static pressure are measured by the double-chamber method.
- Noise level is measured in the A range, at a distance of 1m from the fan intake side.
- Operating Voltage Range: +15%, -15% of the rated voltage
- An overheat protection function is installed.
- All products are for use in the Class II (for EN60950), low voltage, limited energy circuit (for UL/CSA standard) or in the safety extra low voltage range (for EN60950). Do not touch the fan blades when the fan is in operation. The use of the optional finger guard is recommended to ensure protection. Standards specifications are listed on page D-2.

Air Flow – Static Pressure Characteristics

Audible Noise Frequency Analysis

Measured at a distance of 1m from the fan intake side

■ Dimensions (Scale 1/4, Unit=mm)

● Mass: 0.9kg

■ Panel Cut-Out (Scale 1/4, Unit: mm)
